

SmartRack[®] Exhaust Duct Kit for AL-83985

AL-83984

Description

The AL-83984 SmartRack Exhaust Duct Kit is a venting system accessory for the AL-83985 Rack-Mounted Air Conditioning Unit. It directs and disperses heat from the AL-83985 through an upper vent into your facility's dropped ceiling plenum, return air duct or other standard ventilation system. By keeping your rack equipment cool and performing at its peak, the AL-83984 helps the AL-83985 reduce your cooling and energy costs.

Ideal for small-space applications where heat is unlikely to disperse on its own, such as an IT closet, the AL-83984 installs using the included hardware.

Two magnetic tube adapters attach to the rack's vented rear door to make the kit compatible with EIA-standard rack enclosures and open frame racks that accommodate the AL-83985.

Features

Reduces Your Cooling and Energy Costs

- Exhaust duct accessory for AL-83985
- Directs and disperses heat through your facility's ventilation system
- Ideal for small IT closets where heat is unlikely to disperse on its own
- Helps keep rack equipment cool and performing at its peak
- Installs using included hardware
