E-Z CALL was invented by a paralyzed engineer,
founded in 1969.

Typical Application

A person with very little strength or range of motion can easily summon help with a gentle push on any part of the Touch Panel. Two clips keep it from moving away.

A "Hook & Loop" strap allows E-Z CALL to be secured to bed rail for more capable users.

Features

- Ultra sensitive "Touch Panel" permits use by almost totally paralyzed individuals.
- Easy for user to locate and operate—No searching or prehension (grasp) required.
- Large Touch Panel—3.5x5 inches.
- Reliable—Waterproof and dust proof switch, rated at 1 million operations!
- Low false-alarm rate.
- Versatile—Securely attaches anywhere on bedding, bedrail, near user's head, hand, foot, etc., for optimum accessibility. Once in place, it stays in place.
- 10 foot cord, with "1/4 inch Phone Plug" connector. It will plug into most hospital call systems, and into the optional Portable Alarm. (AL-74619)
- Rugged, high quality—Made in USA, 5 Year warranty on materials and workmanship!
- Also available—Special cords, connectors, and "Normally Closed" switch.
- Low Price

Portable Alarm for use with E-Z CALL

Description

The AL-74619 is a small, light weight, battery powered Portable Alarm, designed for use with E-Z CALL Nurse Call Switch. The plug on the E-Z CALL cable connects directly to the input jack on the Alarm. Uses the same kind of alarm commonly used on medical devices. It produces a loud, steady penetrating whistle. On special order, it is also

available as a "latching" and/or pulsating whistle.

Alarm is ideal for situations where a centralized call system is not available or not practical. Examples include mobile or fixed locations such as gurneys or beds temporarily moved away from central call system connections, wheelchairs, and in-home settings.

Features

- Directly compatible with E-Z CALL Nurse Call Switch and Bite-or-Puff Mouth-operated Switch.
- Produces a loud penetrating whistle.
- No need for central call system. May be used at home and in mobile situations.
- Battery powered—Uses standard 9 volt battery.
- Long battery life—Typically several months.
- Compact—Approximately 5.5x3.5x1.8 inches.
- Light weight—Approximately 6 ounces.
- High quality—Made in U.S.A., 5 year warranty. on materials and workmanship (except battery).
- Low Price.
