

AL-61982

Baby Scale with Fine 1g Graduation and Wireless Transmission

EMR-integrated

- Fine graduation of 1 gram for detecting even the slightest weight changes.
- Wireless transmission of data for EMR connectivity or wireless reception.
- Damping system for precise weighing of restless infants within seconds.
- New backlit LCD for easy reading.
- Auto-HOLD function for prolonged display of results.

Pediatric requirements carry weight.

The AL-61982 makes routine work easier for doctors, nurses and other caregivers. Its state-of-the-art weighing technology is now accurate down to a single gram and features a special damping system, making weighing fast, safe and precise. You can even unplug it and use it anywhere with its rechargeable battery power supply.

The damping system ensures fast and precise measurements.

A baby can certainly be fidgety while being weighed, but this is no problem with the AL-61982. Even if the baby is moving and starts to wriggle around, the scale delivers precise measurements within seconds thanks to its highly sensitive weighing technology. Its optimized damping system levels off any vibrations caused by the baby's movements, enabling medical staff to concentrate completely on the weighing process.

The new backlit LCD display ensures an easy reading of the digits, even in dimmed rooms.

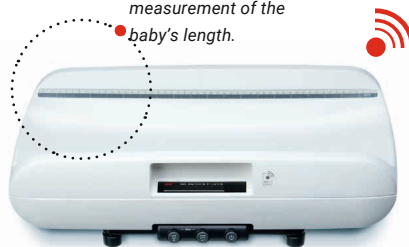

Can be operated by battery or power adapter.

Comfortable and reliable weighing process.

The large weighing tray makes the baby feel safe and secure. Its generous size even allows small children of up to 44 lbs to be weighed easily in a seated position. Made of a special plastic material, it quickly adjusts to the body temperature, giving the baby a sense of comfort. A new backlit LCD display ensures comfortable reading of the digits, even in dimmed rooms. Reading becomes easier than ever due to the auto-HOLD function. It freezes the measurement result on the display for five minutes with battery operation and endlessly with power supply. Medical staff can then take care of the baby before reading and recording the weight.

Thanks to the additional measuring tape, the AL-61982 enables a precise measurement of the baby's length.

Paperless and error-free wireless transmission of measurements.

With the 360° wireless technology, the AL-61982 can transmit measurements to the optional 360° wireless digital printer. With the network-capable software solutions analytics or flash and wireless USB adapter, your PC can receive and analyze measurements and forward them to an Electronic Medical Record (EMR) system. The AL-61982 is EMR-integrated, ready to handle digital patient records and all the demands the future will bring.

AL-61982

Technical Data

- Capacity: 44 lbs / 20 kg
- Graduation: 1 g < 6 kg > 2 g / 0.1 oz
- Dimensions (WxHxD): 21.7 x 5.9 x 12.6" / 551 x 151 x 320 mm
- Weight: 15.7 lbs / 7.1 kg
- Power supply: Power adapter / rechargeable batteries
- Functions: Automatic switch-off, TARE, HOLD, auto-HOLD, weighing range switch-over, kg/lbs switch-over, damping
- Data transmission: wireless technology 360° wireless
- System compatible with: 360° wireless printer advanced, 360° wireless printer, software analytics and emr flash, 360° wireless USB adapter
- Additional measuring tape: Measuring range: 0 – 20" / 0 – 50 cm Graduation: 1/8" / 1 mm
