

AL-61983

Digital Baby Scale with Fine Graduation

- Fine 2g graduation to determine the smallest changes in weight.
- Auto-HOLD and TARE functions for ease of operation.
- Automatic switch-off reduces power consumption.
- Robust and easy to clean weighing tray.
- Measuring rod included.

A safe and secure start to life.

A new baby has arrived – parents and doctors are there to ensure his or her health. Every gram is important. With its ease of operation and fine 2g graduation, the digital baby scale AL-61983 is a valuable aid when monitoring the development of a newborn child, especially in the hospital. For healthy growth from the very beginning.

Fine graduation for determining the smallest changes in weight.

The sensitive electronics of the AL-61983 determine the weight of the newborn child down to 2 grams exactly. As far as precision is concerned, this scale is far ahead of its competitors. The intelligent damping system ensures that the measuring result is still precise even if the baby should become restless. The result is easy to read on the brightly illuminated LED display even if there is little light.

The plastic surface is pleasant to the touch and easy to clean.

Maximum precision makes this scale particularly suitable for neonatology.

TARE and auto-HOLD functions for ease of operation.

With the integrated TARE function, the weight of a soft mat or blanket can be easily deducted at the touch of a button. With the aid of the auto-HOLD function, the result is displayed even after the baby has been taken off the scale – a baby can therefore first be attended to before its weight is noted. The zero point of the scale can change as the result of external influences especially in the case of such highly sensitive electronics, it is automatically checked and aligned every second. The automatic switch-off after ten minutes prevents unnecessary power consumption.

Robust and easy to clean weighing tray.

The baby can easily be placed on the tilt-resistant weighing tray of the AL-61983, the sides of which are open. The baby feels safe and secure in the ergonomically shaped, slightly curved tray. The surface material is kind to the skin and is easy to clean and disinfect.

Measuring rod.

The included measuring rod converts the scale into a complete weighing and measuring system. The power supply supplied by a power adapter or rechargeable batteries.

AL-61983

Technical Data

- Capacity: 44 lbs / 20 kg
- Graduation: 0.1 oz < 22 lbs > 0.2 oz / 2 g < 10 kg > 5 g
- Dimensions (WxHxD): 21.7 x 6.4 x 12.6" / 550 x 163 x 320 mm
- Weight scale: 11.9 lbs / 5.4 kg
- Weight measuring rod: 1.2 lbs / 522 g
- Power supply: power adapter / rechargeable batteries
- Functions: TARE, auto-HOLD, weighing range switch-over, lbs/kg switch-over, automatic switch-off
- Optional: head and foot positioners
