Digital Multifunctional Scale

- Safe weighing of standing, sitting or wheelchair patients.
- Large, easy-to-access platform.
- Wheel barrier provides extra safety.
- Drive-up ramp included.
- TARE, auto-HOLD and damping function.
- Integrated transport casters allow for easy mobility.

Weighing without restrictions.

The multifunction scale is a jack-of-all-trades. Thanks to its many functions, this scale is ideal for use in hospitals, general medicine, nephrology, youth medicine as well as in nursing homes. We have addressed the many needs of daily medical life through sophisticated and functional design. The result? A scale that makes your work easier, everyday.

Safe weighing of standing, sitting or wheelchair patients.

On this scale patients can stand aided by a stable handrail, sit on the integrated folding seat, or remain in a wheelchair on the large platform (31.5 x 33.5"). When standing, a stable handrail provides a safe hold for unstable patients. When sitting, a comfortable seat for minimally ambulatory patients can be raised and lowered with one hand. Special attention was given to making the scale easy to access, and a stop barrier for the front wheels of the wheelchair provides additional safety.

You can stand or sit when you are being weighed.

Thanks to the integrated ramp, a wheelchair rolls easily and comfortably onto the platform.

TARE and auto-HOLD function.

TARE and pre-TARE functions enable reliable net weight determination in spite of added weight, for example by deducting the known weight of a wheelchair. The practical auto-HOLD function shows the weight even after the patient has left the scale. The weight is always easy for patient and caregiver to read from the swiveling display mounted at convenient hip level.

Useful details for perfect handling.

The non-slip rubber coating and handrail add safety, while integrated transport castors make the scale easy to move.

A fold-out seat with integrated damping system?

The multifunctional scale is equipped with a stop barrier for wheelchairs and another detail that adds to overall safety. A spring in the mechanism for the integrated seat keeps the seat securely in place until it is released for use.

Technical Data

- Capacity: 800 lbs / 360 kg
- Graduation: 0.1 lbs / 50 g
- Dimensions (WxHxD): 35.8 x 43.3 x 41.9" / 910 x 1,100 x 1,064 mm
- Dimensions platform (WxHxD): 31.5 x 2 x 33.1" / 800 x 50 x 840 mm
- Weight: 130 lbs / 59.5 kg
- Functions: TARE, pre-TARE, HOLD, auto-HOLD, BMI, auto-CLEAR, kg/lbs switch-over, damping, SEND/PRINT
- Power supply: Power adapter
- Data transmission: 360° wireless technology
- Optional: RS232 adapter set
- Including ramp
- System compatible with: 360° wireless printer advanced, 360° wireless printer, software analytics and emr flash, 360° wireless USB adapter, stadiometers
