AL-71015

Digital Column Scale with Capacity of up to 660 pounds

EMR-integrated

- Network-capable with 360° wireless technology.

- Accurate, extremely robust scale technology for up to 660 pounds.

- BMI, Pre-TARE, HOLD, auto-HOLD, mother/child function.

- Measuring rod included.

- At the press of a button measured results can be transmitted wirelessly to a wireless printer or a PC.

The multi-faceted talent with network capability.

W eighing small children to obese patients – the new AL-71015 can do it all. Especially when it comes to finding out BMI and height. Then there are two options: integrate a mechanical measuring rod or receive data wirelessly from a separate digital stadiometer. And everything that the AL-71015 weighs, measures and calculates is effi ciently transmitted with 360° wireless technology to the software analytics on your PC or to the 360° wireless printer advanced and 360° wireless printer. If you like.

550 pounds capacity can handle it all.

Heavyweight or obese patients can easily and safely step onto the large, fl at platform of the AL-71015. Nothing wobbles, nothing threatens a secure foothold, thanks to the solid base of cast iron and a non-slip surface of ribbed rubber.

With the 360° wireless technology, at the press of a button the AL-71015 can send results to an optional wireless printer or to the software on your PC.

The BMI Function simplifi es your work.

Especially with the BMI, the AL-71015 is your able assistant. It even helps to determine the patient's height, mechanically with the fully integrated measuring rods or very conveniently with the digital 360° wireless stadiometers. The results are sent to the scale, which then calculates the BMI from the patient's weight and height.

Pre-TARE, mother/child function, HOLD and auto-HOLD shorten the time.

Do you want to deduct a stored value, e.g., clothing, from the patient's weight?Press Pre-TARE. Or weigh a child held in a parent's arms? Do it with the mother/child function. Need to store the results quickly now for reading later? Good thing the scale has auto-HOLD.

Paperless and error-free wireless transmission of measurements.

With the 360° wireless technology the AL-71015 can transmit measurements to the optional 360° wireless printer. With the network-capable software solutions analytics or emr flash 101 and wireless USB adapter, your PC can receive and analyze measurements and forward them to an Electronic Medical Record (EMR) system. Thus the AL-71015 is EMR-integrated and ready to handle digital patient records and all the demands the future will bring.

AL-71015

Technical Data

- Capacity: 660 lbs / 300 kg
- Graduation: 0.1 lbs < 330 lbs > 0.2 lbs / 50 g < 150 kg > 100 g
- Dimensions (WxHxD): 14.2 x 36.6 x 20.5" / 360 x 930 x 520 mm
- Platform (WxHxD): 13.2 x 3.1 x 13.6" / 335 x 80 x 345 mm

- Weight: 33.5 lbs
- Power supply: batteries / mains adapter (optional)
- Data transmission: 360° wireless technology
- Functions: TARE, Pre-TARE, mother/child-function, HOLD, auto-HOLD, BMI, auto-CLEAR, lbs/kg switch-over, damping, automatic switch-off, SEND/PRINT
- Optional: measuring rod, power adapter, universal power adapter
- System compatible with: 360° wireless printer advanced, 360° wireless printer, software analytics and emr flash, 360° wireless USB adapter
