PROVIDING A CLEANER ENVIRONMENT WHILE REDUCING OPERATIONAL COST

AL-71862

99% CLEANER*

Problem

- TV Remote controls are one of the most often touched objects in a patients room.
- Remote controls are one of the most contaminated surfaces in a patients room. Remotes have often been tested to carry MRSA and other dangerous bacteria.
- Standard TV remotes are impossible to clean properly due to crevices and openings.

Solution - Clean Remote

- Clean Remote flat non-porous surface is easily disinfected
- Clinically tested to carry 99% less bacteria than all other remotes tested
- An invaluable tool in the battle against the spread of infection

SAVE MONEY

- SPILLPROOF – Do not have to replace Remote Control every time someone spills liquid or food on remote.
- Attached Battery Door – Save money not needing to replace often lost battery door
- HIDDEN Batteries – Prevents costly replacement of stolen batteries by patients and visitors for personal electronics.
- No Codes or reprogramming ever. Simple One-Touch setup & remote is programmed for life.
- Works over 250 brands of TV's – no need for different remotes Clean Remote works them all.
- Only staff can reprogram remote if needed.

Uses 2 AAA Batteries
