

Anti-Theft

PUSH BAR

Announcing a *major advancement* in wheelchairs!

Standard wheelchairs have no leverage - forcing you to hunch over to gain control of the chair. This puts stress and fatigue on your back, shoulders and wrist.

Often a cart, I.V. Pole or O2 stand must accompany the patient. Seamlessly hold onto both objects with more comfort and control by using the handle extensions from ALCO.

Provides a comfortable hand position and posture no matter the height of the user.

Makes more room behind wheelchair for O2 holders and other equipment.

model
is 6'11"

ANTI-THEFT
