- With Breast-Milk-Intake-Function (BMIF).
- Handy and light for mobile medical use.
- Comfortable cradle.
- Large, easy to read LCD display.
- Reliable results due to automatic damping system.
- Optional measuring rod.

The mobile baby scale with special damping system.

Modern technology can only be of use if it passes the tests of everyday life. The digital baby scale AL-82379 has all that is necessary to make daily routine in the surgery and hospital so much easier as this scale is not only easy to use but also mobile and durable, it meets all the prerequisites of an ideal scale for pediatrics.

Handy and lightweight for mobile medical use.

Weighing only 6.2 lbs, this scale is a real lightweight in its class. The integrated side handle makes it easy to transport. Another practical feature is the flat and thus space-saving design, making it easy to store the scale away in the drawer of a baby's changing table. It can be packed away safely for transport in the optional transport case.

Easy to operate with generously sized cradle and easy to read LCD display.

The baby feels at ease and safe in the extra large, comfortable weighing tray of the AL-82379. Larger babies or small children can be weighed in a sitting position. The weight is shown on the brightly illuminated LCD display and the automatic switch-off ensures power-saving operation. With the Breast-Milk-Intake-Function (BMIF), one can determine how much milk the baby has drank when breast fed. At the touch of a button, the weight of the baby determined before feeding is deducted from the weight determined after feeding.

The optional measuring rod permits weighing and measuring in one step.

Reliable results due to the automatic damping system.

Absolute precision in all situations: fitted with highly sensitive weighing technology and the special damping system, exact results are provided with the AL-82379. Even when babies are very restless.

Optional measuring rod.

When fitted with the optional measuring rod, the baby scale AL-82379 becomes a time-saving, combined measuring and weighing station.

AL-82379

Technical Data

- Capacity: 44 lbs / 20 kg
- Graduation: 0.5 oz / 5 g < 10 kg > 10 g
- Dimensions (WxHxD): 25.1 x 4.1 x 11.8" / 638 x 105 x 300 mm
- Dimensions/weighing platform (WxHxD): 23.4 x 2 x 10" / 595 x 50 x 255 mm
