

AL-85721 & AL-85722

Carts for Mobile Support of Baby Scales

new

AL-85721

AL-85722

- Custom-made indentations on the surface hold baby scales firmly in place.
- Ideal working height of 31.5 inches / 80 cm.
- Integrated drawer and shelf offer extra storage space so you always have everything within reach (AL-85722).
- Optional available paper roll holder helps you keep the work area clean (AL-85721).

The perfect supplement to baby scales.

The AL-85721 and AL-85722 carts are ideal supplements to baby scales. They were specially developed for safe and hygienic routine use in hospitals and medical practices. Customized indentations on the surface accommodate the scale's base and ensure that the scale does not slip out of place. Two practical brakes keep the cart stable so babies can be safely weighed. And you can push or pull the cart by its handle to move the baby scale quickly to the place where it's needed.

For work that's simple, ergonomic and hygienic.

Mobile and safe use of baby scales is of prime importance in pediatrics. So now the baby scales can be securely positioned on specially developed carts. The ergonomic design of the carts, with a work surface over 31 inches, ensures safe work processes. Hygienic standards are easier to maintain, thanks to the seamless, easy-to-clean surface.

The AL-85722 offers practical storage options.

The expanded variant of the cart has practical storage space that keeps documents and materials close at hand. Extra space is provided by a shelf and an integrated drawer.

Safe measuring and weighing anywhere – with the AL-85721.

In the basic model the AL-85721 cart offers all the advantages of safe, mobile and hygienic work with baby scales. A practical and simple to install paper roll holder is optionally available.

The optional paper roll holder on the AL-85721 makes work even easier and more hygienic.

Customized indentations keep the baby scale anchored on the cart.

Four bumpers on the wheels protect the cart and scale from collisions with walls and doors.
