

MADE
IN THE **USA**

Product Description:

- Infection Prevention System
- Holds one to two boxes of facial tissues or one box of gloves, one hand sanitizer bottle, and one wet wipe canister
- 11.00"W x 8.50"H MP-075 Sign Holder (included)
- Keyholes for wall mounting, can sit on a counter, or mount to a Floor Stand
- Quartz Beige ABS Plastic and Clear PETG Plastic

Primary Area for Product Usage:

- Anywhere personal protective equipment is needed

Dispenses:

- Left: Bottles/canisters no larger than 3.75" (9.5 cm) in diameter
- Middle: Box(es) no larger than 5.00"W x 10.00"H x 5.50"D (12.7 cm x 25.4 cm x 14.0 cm)
- Right: Canisters/bottles up to 5.50" (14.0 cm) in diameter

Package Specifications:

- Package Quantity: 1 per case
- 16"L x 12"W x 12"H (40.6 cm x 30.5 cm x 30.5 cm)
- 5.0 lbs (2.3 kg) - approximated

Product Specifications (overall external assembled dimensions):

- 15.00"W x 20.28"H x 5.75"D (38.1 cm x 51.5 cm x 14.6 cm)
- 1.8 lbs (0.8 kg) - approximated

Mounting Specifications:

Alternative Uses:

- AL-89812 shown below with gloves instead of tissues

Installation

Always mount dispensers securely *prior* to loading with product.

- Attach sign holder using included barrel screws.
- Mount securely to a wall with screws approved and supplied by building maintenance.

- System can also be mounted to a Floor Stand (sold separately) as shown below.
- Load with product only AFTER dispenser is secured.

Parts included:

- Dispenser
- Sign Holder
- Barrel Screws (2x Sets)
- Infection Prevention signage

Tools Required:

- No tools required to assemble dispenser

Care and Construction

ABS Plastic

Material Characteristics

Designed for Long-Term, Heavy-Duty Applications

The combination of copolymers (Acrylonitrile, Butadiene, and Styrene) gives ABS an excellent combination of strength, rigidity, and toughness.

ABS is chemical, stress-crack resistant, dimensionally stable, and will hold up to long-term use. It possesses high strength and performance characteristics at a reasonable cost.

Care and Cleaning

Use mild soap and water to clean. Petroleum-based oils, solvents, and paints should not be used.

Standard hospital cleaning supplies are approved for use on our ABS plastic products.

PETG Plastic

Material Characteristics

Designed for Long-Term, Heavy-Duty Applications

Copolyester resin is designed for heavy-duty applications. We never use acrylic in our products.

Copolyester (PETG) is typically 15-20 times tougher than general purpose acrylic. PETG is made to withstand handling and reduce losses due to breakage.

PETG resists a variety of chemicals and commonly used cleaning agents. It is tough and durable (not brittle), providing years of trouble-free functionality and long life.

Clear optical characteristics mean the viewer can see the content, read text, and see true colors through the material. It complies with FDA regulations for food contact.

Care and Cleaning

Most cleaning chemicals do not weaken the surface or cause damage to the material. Suggested cleaning method is to use a soft cloth, warm water, and mild soap.
