

The AL-89974 Dignity® AllDay 400 Wheelchair virtually eliminates the need for toilet transfers — safer for patients and caregivers alike!

The Dignity® AllDay 400 Wheelchair is a manual chair comfortable enough for all-day use, and boasts a unique feature — a lever-operated drop seat which allows the chair to position over a toilet without requiring a transfer. As such, this innovation saves 2000 or more transfers annually per user. This patented technology can significantly reduce the potential of injury for users, healthcare workers and personal caregivers by creating an efficient and simplified elimination process.

In addition to the drop seat feature and comfort design, the Dignity® AllDay 400 Wheelchair showcases our patented TruGlides™ Anti-shock Caster System. Studies have shown that 80% of wheelchair vibration stems from the front casters. Incorporation of a front caster suspension system minimizes vibration, providing a smooth and comfortable ride. The TruGlides™ system provides improved maneuverability and safety through automatic alignment of the front casters, thereby reducing wheel flutter and drag.

The Dignity® AllDay 400 Wheelchair offers:

- ✓ Increased safety for patients and caregivers
- ✓ Improved maneuverability and smoother ride
- ✓ Minimized workplace injuries with fewer transfers
- ✓ Reduction of risk during the elimination process
- ✓ Reduction of caregivers required for elimination needs
- ✓ Quick and easy cleaning
- ✓ Long term use as well as during post-operative and rehabilitation periods
- ✓ Optimized space by storing over a toilet when not in use
