

**MATERIALS:**

**Receptacle** — 18-8, type-304, 20-gauge (1.0mm) stainless steel. All-welded construction. Exposed surfaces have satin finish. Top edge hemmed and bottom has recessed finger grip. Stainless steel reinforcement straps on back of unit provide strength to the four mounting screw holes. Capacity: 12.75-gal. (48.3-L).

**Trash Liner Holder** — Unit equipped with liner holder to facilitate installation and removal of disposable trash liners and retains liner inside waste receptacle. Liner holder shall have a molded plastic sleeve with a 20-gauge (1.0mm) stainless steel, U-shaped support strap hemmed for safety; riveted construction. Liner holder shall rest inside of waste receptacle area.

**OPERATION:**

Top edge of waste receptacle is hemmed and bottom has a recessed finger grip for safe handling. The space between bottom of waste receptacle and the floor when unit is properly mounted facilitates floor cleaning. Unit is equipped with a liner holder

to accommodate disposable trash liners. Liner holder eliminates unsightly trash liner overhang and facilitates installation and removal of disposable trash liners.

To insert disposable trash liner, lift liner holder up and forward and rest over edge of waste receptacle front panel with the bottom notches of the liner holder engaged on top front edge of receptacle. Place disposable trash liner inside the liner holder and fold disposable trash liner over the holder sleeve. Tie a knot in the corner of the bag, then place the liner holder with disposable trash liner back into receptacle. To empty, gather disposable trash liner from the liner holder sleeve and lift bag up.

**INSTALLATION:**

Mount unit on wall with four sheet-metal screws (not furnished) at points indicated by an *S*. For plaster or dry wall construction, provide concealed backing to comply with local building codes and secure with sheet-metal screws. For other

wall surfaces, provide fiber plugs or expansion shields for use with sheet-metal screws, or provide 1/8" (3mm) toggle bolts or expansion bolts.

**SPECIFICATION:**

Surface-mounted waste receptacle shall be type-304 stainless steel with all-welded construction; exposed surfaces shall have satin finish. Top edge shall be hemmed and bottom of waste receptacle shall have recessed finger grip for safe handling. Waste receptacle shall be equipped with a liner holder to facilitate installation and removal of disposable trash liners and retains liner inside waste receptacle. Liner holder shall have a molded plastic sleeve with a 20-gauge (1.0mm) stainless steel, U-shaped support strap hemmed for safety; riveted construction. Liner holder shall rest inside of waste receptacle area. Capacity shall be 12.75-gal. (48.3-L).
