- Lightweight aluminum.
- Height and depth adjustable.
- Rotates inward and outward.
- Handgrips extend forward or backward, supinate, pronate and are angle adjustable.
- Contoured armrest is molded into one piece with a flexible edge for added comfort.
- Hook and loop fastener straps prevent arms from slipping.
- May be mounted anywhere along the handlebar, including the front. Position is determined by patient's weight bearing needs.
- May be mounted facing toward the inside (Figure A) or outside (Figure B) of the handlebar for lateral adjustability.
- Each side is individually adjustable.

specifications
