

BASELINE[®] **EVALUATION INSTRUMENTS**

VOLUMETRIC EDEMA GAUGES AL-63375

AL-63375-FT

AL-63375-FA

Options:

- 5"x3"x9" Hand set AL-63375-HN
- 7"x7"x30" Arm set AL-63375-AR
- 6"x6"x24" Forearm set AL-63375-FA
- 13"x5"x9" Foot set AL-63375-FT
- 13"x6"x24" Partial leg set AL-63375-PL

Cleaning Procedures

To clean plastic tank Use rag with lemon Pledge[®] or a similar solution. This keeps the plastic from attracting dust, it also maintains the transparency of the unit.

To clean graduated cylinder and receiving cup Wash with soap and water, rinse off and dry.

Baseline[®] **Volumetric Edema Gauges**

The volumeter is designed to objectively measure volume of the body parts by using the fluid displacement method. The body part is placed in a water-filled tank. The resultant overflow is collected and measured. By taking measurements over time, edema can be measured and quantified. Sets include volumeter, receiving (overflow) cup and measurement vessel (graduated cylinder).
