

AL-70540

Digital Wheelchair Scale with Handrail and Wireless Transmission

EMR integrated

- Generously sized platform.
- Railing provides a stable standing aid.
- Foldable and mobile.
- Two fold-away ramps included.
- Pre-TARE function with three memory cells.
- At the press of a button measured results can be transmitted wirelessly to a 360° wireless digital printer or a PC.

Safe weighing – even when standing is difficult.

It is ideal to be physically fit and mobile, however, this is not possible for everyone. Many people find it increasingly more difficult to walk and stand as they get older. Many suffer from metabolic illnesses such as diabetes and often suffer from being overweight as a result. The elderly and the young suffer from injuries such as breaking a bone. Women are strongly impeded in the last months of a pregnancy. Hospitals, rehabilitation centers, and nursing homes must be prepared for all handicaps. And they will be – with the wheelchair scale AL-70540.

Generously sized platform and stable railing.

Stable, functional and mobile: thanks to its large platform and sturdy handrail, the AL-70540 is extremely versatile. Patients can be weighed while sitting in a wheelchair or a chair. The handrail provides valuable support for people who are frail or have difficulty walking. Its high load capacity makes the AL-70540 ideal for weighing very heavy patients.

Foldable, mobile and space-saving.

After use, the scale can be folded together to save space. The sturdy locking device between the rail and platform ensures that the AL-70540 stands safely even when folded. The handrail also serves as handle when the scale is folded, allowing the scale to be moved around or stowed away effortlessly and quickly on its transport casters.

Integrated ramp folds up for trouble free transport.

Intelligent functions for comfortable weighing.

The swivel-mounted display at hip level ensures comfortable operation for physicians. After being weighed, the patient can first be attended to without any stress as the weight is stored by the HOLD function. The additional weight of all aids used such as a chair or wheelchair can be deducted at the touch of a button, thanks to the TARE function. The scale has memory cells for storing three additional weights as well as the height of three persons. The BMI function provides the individual nutritional condition of the weighed person.

Paperless and error-free wireless transmission of measurements.

With the 360° wireless technology the AL-70540 can transmit measurements to the optional 360° wireless digital printer. With the network-capable software solutions analytics or emr flash and wireless USB adapter, your PC can receive and analyze measurements and forward them to an Electronic Medical Record (EMR) system. Thus, the AL-70540 is EMR integrated and ready to handle digital patient records while meeting all the demands the future will bring.

AL-70540

Technical Data

- Capacity: 800 lbs / 360 kg
- Graduation: 0.1 lbs / 50 g
- Dimensions (WxD): 36.2 x 44.1 x 45.3" / 920 x 1,120 x 1,150 mm
- Dimensions/platform (WxD): 31.5 x 2.2 x 38" / 800 x 55 x 965 mm
- Weight: 83.8 lbs / 38 kg
- Power supply: Power adapter
- Data transmission: 360° wireless technology
- Functions: TARE, pre-TARE, HOLD, auto-HOLD, BMI, auto-CLEAR, lbs/kg switch-over, damping, SEND/PRINT
- System compatible with: 360° wireless digital printer advanced, 360° wireless digital printer, 360° wireless USB adapter, software analytics and emr flash, stadiometers
- RS232 compatible
