Legholder Pads

The Replacement Clam Shell Pads are designed for the Yellofin Legholder System. As part of all the leg support systems offered, our legholder pads are integral in providing the perfect fit and placement. Each pad is manufactured with memory foam and covered with high-quality, medical-grade, soft 4-way stretch vinyl fabric to ensure patient comfort during procedures. Can be used to support foot, ankle, and calf and protect these areas, as well as other crucial pressure points. Vinyl comes in 9 different colors upon request. Black vinyl will be supplied unless specified otherwise.

Features:

- Radiolucent
- Pressure Management
- Reusable - Easy to clean
- Latex free and fluid resistant
- MRI Compatible
- Prevents pressure related injuries and protects crucial pressure points

Materials:

- 4-way stretch black vinyl
- Pressure management memory foam
