

Augustine Treatment Recliner

We believe the Augustine Treatment Recliner can truly make a difference in patient care. The Augustine was developed to be 100% patient-centric; to be comfortable and help put the patient at ease. The result is an attractive and inviting, clinically preferred recliner, with unique solutions for enhanced clinical utility.

- Enhanced range of motion for optimum, patient selectable, positioning
- Spacious seat creates personal space and luxurious comfort
- Unmatched stability coupled with thoughtful features to ease chair movement and cleaning
- Styling and convenience enhanced with nearly invisible concealed casters

Developed in conjunction with Oncology clinics, Augustine is also ideally suited for use in patient rooms, recovery, and Long Term Care. Augustine demonstrates our commitment to developing products that meet the needs of the people that live in and touch the recliners on a daily basis.

SERENITY: PERSONAL SPACE AND INDEPENDENCE

Often the medical treatment environment unavoidably impinges upon the patient's personal space. Augustine addresses this with a welcoming and spacious patient seating area.

- Low seat height to ease entry and exit.
- Room to stretch out or curl-up and relax
- Easy to recline which allows desired positioning without assistance.

Patients were clear when asked their needs; they wanted a chair where they could feel at ease, have some independence and a relaxing experience. Augustine is designed to mimic furniture that you would be proud to have in your own home.

Augustine is designed to mimic furniture that you would be proud to have in your own home.

The Central Front Braking option (CFB).

CLINICIAN INPUT: DESIGN ENHANCEMENT

The quick release seat is an Augustine clinician-driven solution. Facility managers requested an easier way to thoroughly clean the recliner. Once removed, full access to the inner sides of the recliner, backrest and seat allows for fast and thorough cleaning.

Simply pull-up at the front and slide forward. There is no need for any tools, and no risk of lost parts. The seat is securely tethered so it won't get separated from the recliner. To replace simply line up the tabs, slide into place and push down – done!

REMOVABLE SEAT: There is no need for any tools or risk of lost parts.

CLINICAL UTILITY: PRACTICAL INNOVATION

Augustine has the clinical features required in a high use medical environment – wheels for positioning, tested durability with "breakaway" mechanism and ease of cleaning. These chairs bring dignity, comfort and grace back to the clinical setting while forfeiting none of the utility.

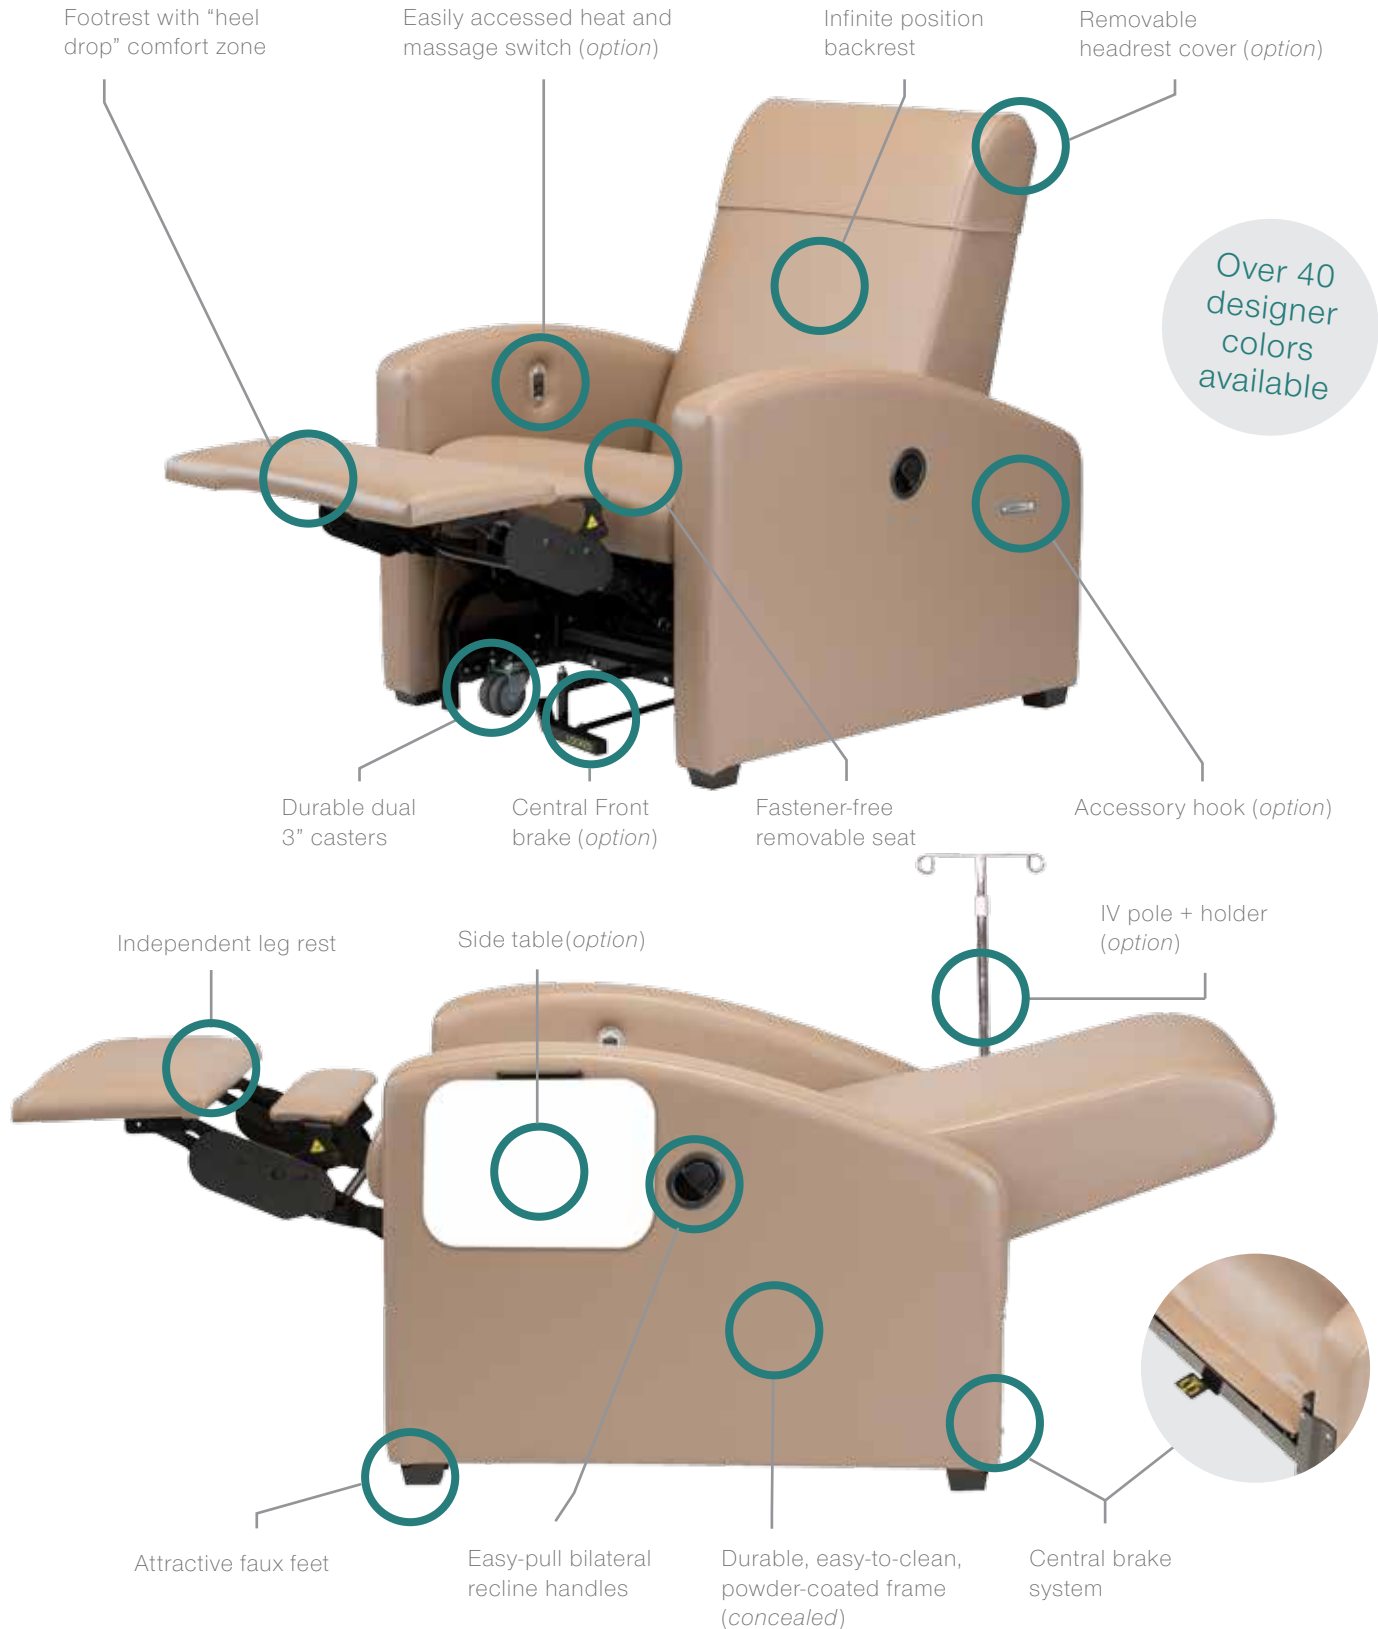

- Standard rear central caster lock offers impressive stability.
- Efficient thorough cleaning with removable seat, no tools required, and no lost parts.
- Maximize clinic space with exclusive new Central Front Brake Option (CFB).

CFB allows effortless, secure braking of the chair from the front, with no obtrusive levers or mechanisms to catch on or impede staff, patients or visitors.
