Standard and Comfort Plus

Standard

Recommended for low risk and short duration procedures. 2" thick overall. Constructed of medium firm high density foam, covered with durable high-grade electrically conductive vinyl.

Comfort Plus

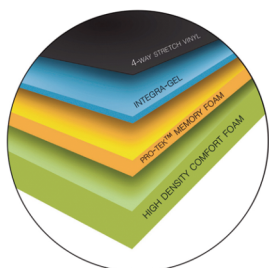

Provide superior comfort for medium-high risk procedures. 2" thick overall. Constructed of high density comfort foam, covered with ultra-soft 4-way stretch vinyl fabric.

Pro-Tek

Pro-Tek

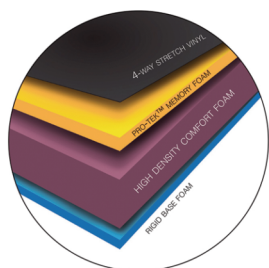

Designed for anti-shear protection and patient comfort. Recommended for high risk patients, medium to long duration procedures. 2-1/2" thick overall. Constructed with high density comfort foam, a top layer of anti-shear Pro-Tek™ Memory foam, covered with 4-way stretch ultra soft vinyl fabric.

Integra Gel

Integra Gel

Designed with ultimate patient comfort in mind. Recommended for high risk and bariatric patients. 3" thick overall. Constructed of high density comfort foam, a layer of anti-shear Pro-Tek™ Memory foam, and a top layer of visco polymer gel, covered with 4-way stretch ultra soft vinyl fabric.

Bariatric

Bariatric

Designed with the comfort of bariatric patients in mind. Recommended for low-high risk bariatric patients. 4" thick overall. Constructed of high density comfort foam, a top layer of anti-shear Pro-Tek™ visco elastic memory foam and supported by a bottom layer of rigid base foam. Covered with 4-way stretch ultra soft vinyl fabric.
