

KEEPING PATIENT AREAS
**CLEAN,
TIDY &
QUIET**

THE WALLGARDIAN[™]
IS DESIGNED TO REDUCE
NOISE AND PROTECT
WALLS FROM DAMAGE.

PROBLEM:

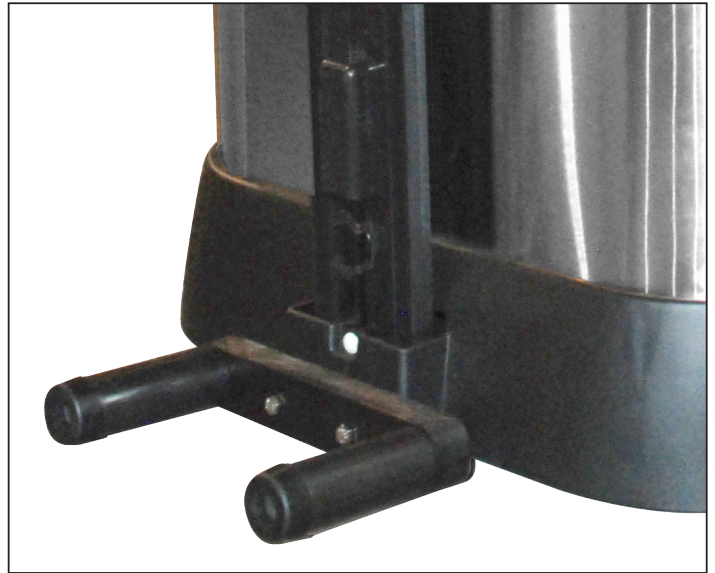

Step-on container lids impact walls, creating noise and disturbing patients while increasing repair costs due to scuffs and scrapes. Noise and wall damage can cause negative public perception and result in poor patient satisfaction scores.

SOLUTION:

WallGardian[™] Bumper Kits keep containers safely away from walls and lids from contacting painted or finished surfaces, preventing damage and greatly reducing noise levels.

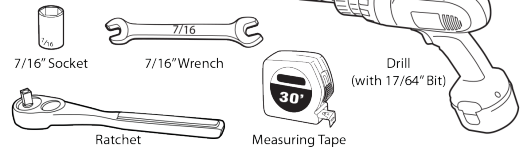

WallGardian[™] Bumper Kits are easily installed on-site and are engineered using non-marking materials that won't mar walls.

WallGuardian™ Bumper Kits fit popular styles of Rubbermaid® step-on containers as well as similar competitive products. Bumper kits are designed to be easily installed on-site.

EASY TO INSTALL!

Tools Needed:

WallGuardian™ Bumper Kit
Includes 2 Bumpers, Mounting Hardware, and Instructions
