

AL-85739

Roll-up Measuring Tape with Wall Attachment

- Space-saving roll-up mechanism.
- Simple read-out of results through display window.
- Durable tape made of metal.

When the quality is right,
so are the measurements.

While measuring rods, stadiometers and circumference measuring tapes are relatively simple devices, they still must fulfill challenging clinical requirements. Whether the devices are for in-patient or mobile use, they all share the same premium quality. A quality you can touch and see – in devices that don't warp after years of use, and continually deliver precise measurements, every time and everywhere.

The space saving solution with roll-up mechanism.

The roll-up measuring tape AL-85739 with wall attachment. Uncomplicated fixing on wall with just one screw. With the display window in the head piece, it's easy to read-off the height. The durable tape is made of metal.

The wall mounting of the measuring tape with roll mechanism reduces space requirements drastically.
