## 868MHz LONG RANGER

“Long Ranger” 868 Mhz Transmitters and Receivers can penetrate through stainless, aluminum, brass or steel bollards as well as concrete walls, floors and metal housings; even through cement to encased operators. The Long Ranger transmitter provides security with its advanced secure rolling code technology (Frequency Hopping Spread Spectrum) that prevents any interference from any other transmitters in the surrounding areas within the 50-75 foot (15-23 meters) range.

Penetrates:

Up to 75 ft.

- Concrete Floors & Walls
- Metal Housing
- Stainless, Aluminum, Brass and Steel Bollards
- Cement encased operator

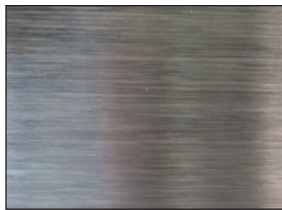

*Backed by a two-year warranty*
