

Multiple Safety Standards: One Solution The Beata Clasp®

The Beata Clasp helps healthcare facilities meet multiple regulatory recommendations and safety initiatives, including:

ECRI Top 10 Hazards: Addresses poor line management (#8 for 2025)

CMS: Supports new quality measures assessing hospital safety strategies and practices

Support their mission to save millions of lives from preventable medical errors by implementing evidence-based solutions.

The Joint Commission: Sentinel Event Alert – Tubing misconnections: A persistent and potentially deadly occurrence

WHO: Patient Safety Solutions, Topic #7 – Avoiding catheter and tubing misconnections

FDA: Supports medical line entanglement prevention and awareness

A single product delivering compliance, safety, and efficiency.

OSHA Guidelines: Reduces workplace hazards by keeping lines organized and off the floor

Hospital CAHPS® Survey: Enhances patient experience by promoting organization, accessibility, and engagement at the bedside
